

PARAGON - INNOVATING THE WAY AGENTS DO BUSINESS

Paragon Release 5.950-5.955

NWIA wanted you to be the first to know about the latest enhancements to your Paragon MLS System. All enhancements are designed to help you navigate through the system and enhance your experience with Paragon. Below is a list of the enhancements and links to view videos or PDFs of the new features. We encourage you to continue reading and let us know what you think on the [Paragon MLS Facebook site](#). Also make sure you click “Like” on the Facebook site to view what’s new with Paragon more frequently.

WHAT’S NEW!

PARAGON

Statistical Reports – Market Activity by Location and Month

Per customer request, the Market Activity by Zip and Month report has been upgraded to allow the results to display by State/Province, Area, City, or Zip/Postal Code. A new Display By dropdown on the criteria page allows the user to select their preferred display of the results. On the report results, the former Zip/Postal Code column will display the selected Display By option. The report has also been renamed to Market Activity by Location and Month.

The screenshot displays the 'Stats Reporting' interface for 'Market Activity by Location and Month'. The 'Criteria (Default)' section includes a 'Date Range' dropdown set to 'Month', with 'Begin' set to 'Jan 2022' and 'End' set to 'Mar 2023'. Below this is a 'Board ID' field and a 'Display By' dropdown menu. The 'Display By' menu is open, showing options: 'Zip Code', 'State', 'County', 'City', and 'Zip Code'. The 'Primary Criteria' section includes a 'Zip Code' field and a 'Property Class' field. The interface also features a 'Customize Search' button and a 'Save Template' button.

Statistical Reporting – Display City, State in Market Activity by Location

By customer request, when Display By=City is selected for the Market Activity by Location and Month report, listings will be grouped by both city and state, and the location column will display both the city and state. This is necessary for accurate results where multiple states in the service area have common city names.

Statistical Reports – Roll up zip code statistics in Market Activity by Location

Per multiple customer requests, the Market Activity by Location > Display by Zip will roll up results into the main five-digit zip code, instead of breaking out each zip+4 into a separate line. This will provide a more complete picture of activity within a specific zip code.

Note: Canadian customers using Postal Code will not be affected by this change.

Updated Market Activity by Zip; results rolled up into main zip code

Generate Driving Directions by Map Pin Location (i.e., Geocodes)

Property Search Driving Directions will now support directions based on the listing's map pin location. The user will have two options to find the driving directions by: Address or Map Pin Location. Whichever option is chosen will apply to all listings that were selected.

This new feature will default to Address when accessed, which is currently what's used today but the user can easily change it to Map Pin Location.

LIM – Geocode Boundary Warning

A new feature in Listing Input and Maintenance will trigger a warning if a listing's geocode is outside boundaries specified by your MLS. When a listing is saved, a field rule will verify the listing's geocode coordinates to those specified by your MLS as the desired market area. If any of the coordinates are outside those boundaries, a warning is returned.

Views and Reports – Tours and Open Houses on Custom Reports

Two new report elements are available in the Custom Views report editor. Upcoming Open Houses (Listing View) and Upcoming Tours (Listing View) allow you to add the next three tours or open houses to any custom report view. The elements can be formatted with all the usual tools in the custom views editor.

Clicking on the data in the report opens the same modal as the Tour and Open House action icons, so all upcoming events can be viewed or printed.

REMARKS	
Remarks	COMING SOON in desirable Vineyard Pointe in S Nampa. This 5 bedroom, 2 bath home sits on a nice sized lot that is fully fenced, includes 2 storage sheds and RV parking. The house boasts an open concept with the living area, dining area, and kitchen making a great place to relax or entertain. The master bedroom and 3 other bedrooms are on main floor. Share via Text Custom Message

Agents can now add an optional custom message when sharing listings through the Share via Text feature from the property search results. This custom message field allows up to 100 characters and the message can be previewed in the Share dialog window. Once the text is sent, it will be recorded in the contact's Message History.

The 'Share' dialog window is shown with the 'Send Message' button highlighted. It features a 'SELECT A CONTACT' section with a search bar containing 'Deedrick, Greg'. Below this, there are several contact options with checkboxes and phone numbers. The 'Text Preview' section displays the following content:

<https://qa40.paragonreels.com/LPS.Services.ShortUrl/goto/IBj6FP>

Contact Nikki Washington at Black Knight MLS Solutions, 407-888-9999

Here are a few more listings to review. Let me know if you want to see any of them. Thx

STOP to cancel

The main application interface is shown with the 'Contacts' tab selected. The 'Messages History' section is highlighted with a red box. The 'SENT MESSAGES' section displays a table of messages sent to 'Greg Deedrick'.

	To	Type	Subject	Date
1	Greg Deedrick	Manual SMS	Share Listings via Text	04/25/2023 1:23:00 PM

Below the table, the details of the selected message are shown:

Collaboration Center

Consistent Price formatting in Collaboration Center and CollabLink views

To present a more consistent user experience, the Price field in Collaboration Center and CollabLink views has been given a standard format. On the detail, grid, thumbnail, and Property History, the price now displays the full price, rather than a shortened version. Example: \$123,456, instead of \$1.2k. Map pins will continue to show the shortened price.

If the non-disclosure configuration setting is enabled, the price on status category 2, Sold, displays the word “Sold” rather than 0, on all views: detail, grid, thumbnail, map, and Property History. [Existing configuration setting COLLABCENTER_NON_DISCLOSURE_REQUIRED.]

The image displays three screenshots from the Black Knight MLS Solutions mobile application, illustrating the consistent price formatting and the 'Sold' status handling.

Left Screenshot (Property Detail): Shows the property details for 143 Ranta Road, Kooskia, ID 83539. The price is displayed as \$2,795,500. A red box highlights the 'SOLD' status, and a red callout box indicates 'Non-disclosure enabled'.

Middle Screenshot (Property History): Shows the property history for 143 Ranta Road. The table lists various transactions, including 'Status: Sold, How Sold, Closing Date, Sold Price, Selling Agent 1, Selling Office 1, Apx SqFt, Off Market Date, Associated Document Count'. The price is consistently formatted as \$3,600,000.

Right Screenshot (Map View): Shows a map view of the property. A red box highlights the '\$2.00M' price tag, and a blue box highlights the 'SOLD' status.

Collaboration Center – Improved Agent Photo Handling

Some formatting changes have been made to the handling of the agent image uploaded in Paragon Professional, to improve the display of the image in Collaboration Center. The image size was changed to allow better resolution, and code was corrected that was causing the image to display off center.

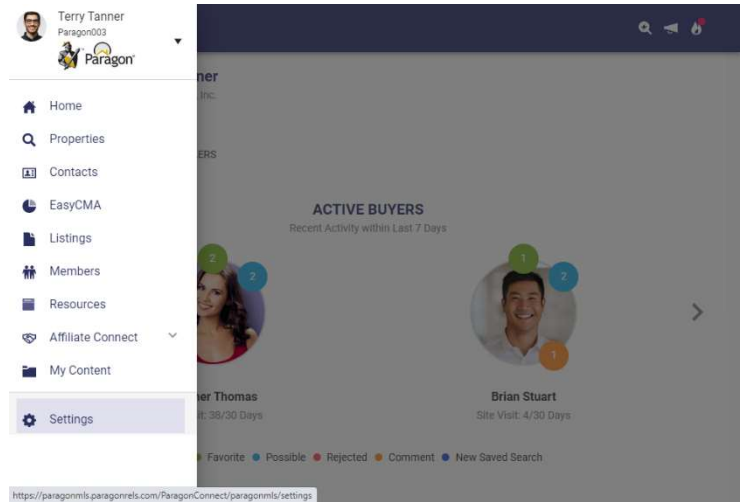

Paragon Connect

Corrections and Improvements

- Resending Welcome Email now includes the office address
- Validate Map link now showing current listing map location
- Third Party Integrations previously blocked without warning by Safari browser pop-up blocker
- Improvements to the loading time of the Dashboard

- Improvements to loading of the Contact Summary page
- Additional options are available under Settings for Collaboration Center setup and Notifications
- Corrections for display of Sqft or Acreage on Detail View
- Correction for lookup relationships on Tour, Open House, and Hotsheet search forms

Settings

Paragon Connect main menu has a new option for Settings. This option will be used to edit and define your agent photo, password (if applicable), and other options. It will expand over time as new settings become available.

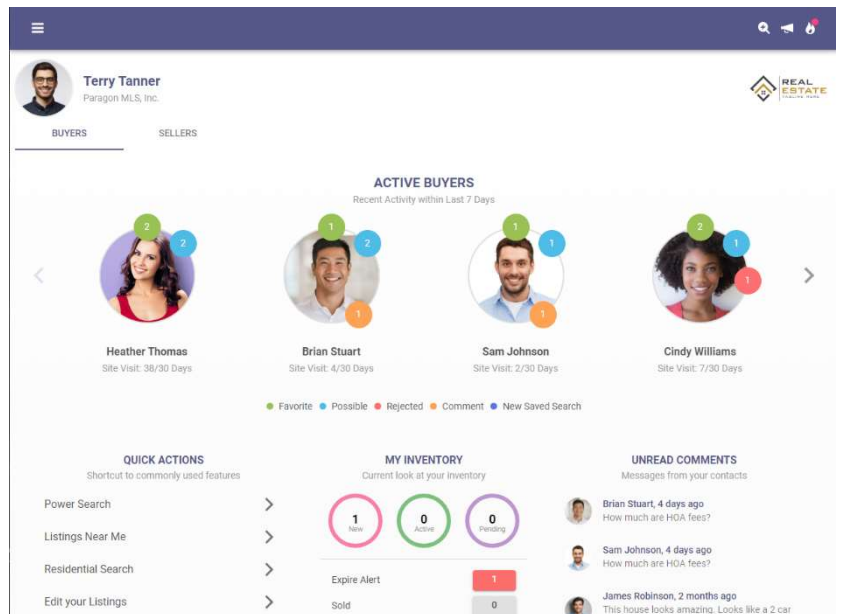

Dashboard

A brand-new version of the Dashboard is now available within Paragon Connect. The new dashboard contains a fresh face for all the data and features previously available and includes a few new options.

The dashboard still promotes the most recent Contact activity and Comments. This version also provides:

- Display of your Office Logo
- New streamlined view for reading and responding to recent contact comments.
- New Quick Action links to give fast access to frequent features.
- Upgraded Power Search that provides auto-display of matching results.

Property Search

Property Class search pages have been updated to use the upgraded look and feel already applied to Hotsheet and Open House searches.

This new search interface is faster, utilizes more visible text/fonts, and remains in sync with your default search in Paragon Professional.

Users may save searches, view recent searches, apply filters to see search criteria, and update the criteria used in their default search.

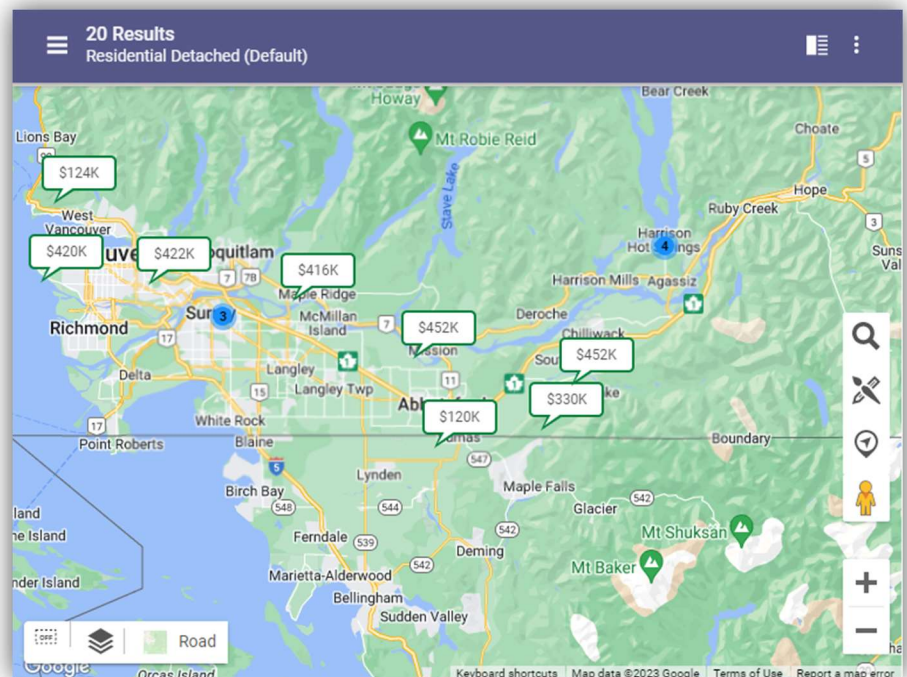

The screenshot shows a search interface with a dark blue header. The header displays '20 Results' and 'Residential Detached...'. Below the header, there are several filter sections: 'List Price' with a range from 100,000 to 500,000; 'Search Date', 'List Date', and 'Sold Date' each with a calendar icon; 'Type of Dwelling' with a dropdown menu showing 'House/Single Family'; and 'Equals' section with 'Total Bedrooms' (2 to 5) and 'Total Baths' (2 to 5). A large blue 'SEARCH' button is located at the bottom right.

Map View

The Map View has also been updated to use the latest look and feel. This option is available for viewing listing results from a property search, along with the Thumbnail and Spreadsheet views.

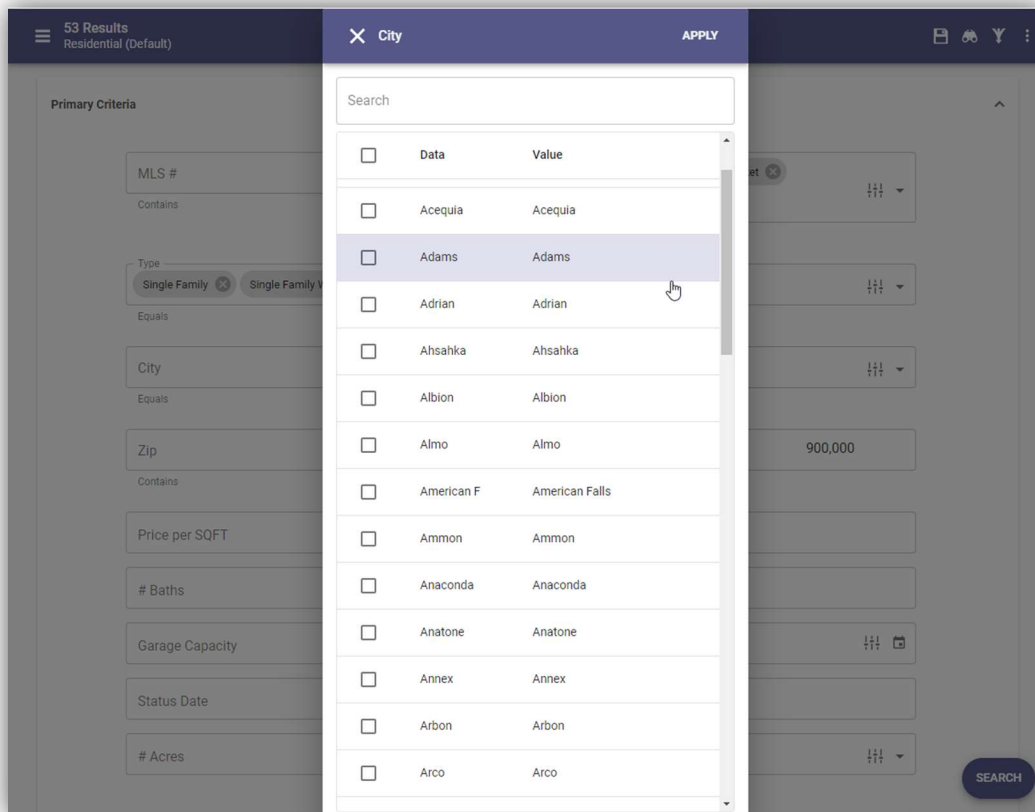

Standard map layers and free-hand drawing options are available. If enabled, users may also select parcels from the Parcel Layer to view public record data or enable a Property Watch.

Full Lookup and Feature Options

Lookup and Feature fields on search forms and listing maintenance now include the ability to see all available options in a new popup window view. This new option works alongside the existing auto-complete type-ahead feature.

Users can quickly type into a field to auto-complete a lookup value or open the new window to scroll through all available options. You can also search for options within the new modal view.

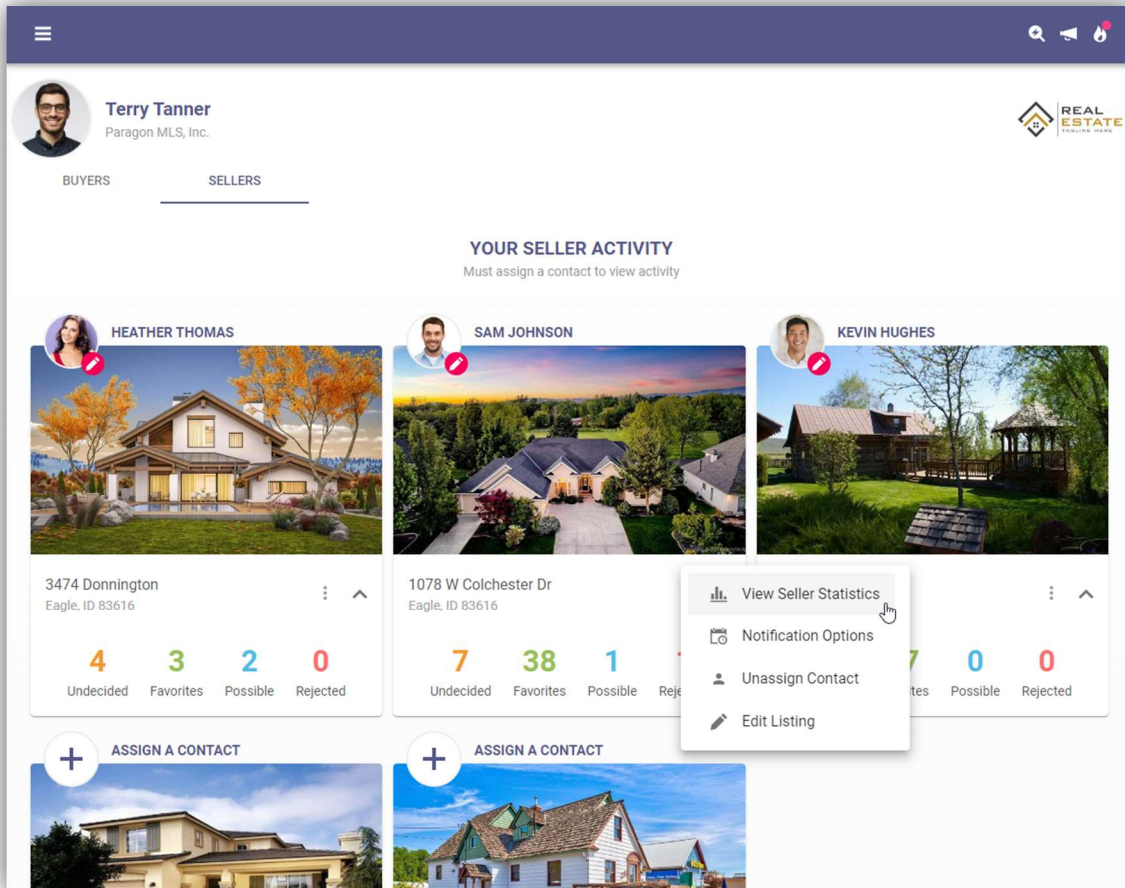

Listing Maintenance Updates

- Office fields on the listing maintenance form will now automatically populate when any corresponding agent field is entered.
- Listing Input Maintenance (LIM) now supports Interactive Map Layers. If Interactive Map Layers are enabled for your system, then data in configured fields will be validated against the corresponding map layers.

Seller Dashboard

Updated versions of the Seller Dashboard and Activity pages are now available. These updates move the same feature and functions for monitoring your Contacts' properties for sale into the latest, fastest interface.

Not Available Rules in Listing Maintenance

Listing Maintenance pages for adding and editing listings has been updated to support “Not Available” field rules. These conditional logic rules allow fields to remain hidden from view until specific conditions are met and the fields become visible.

Tax Autofill for Paragon Tax

The add Listing process now supports Tax Autofill for Paragon Tax. Setup by Black Knight will be required before this feature is available for all Paragon Tax Customers. Teams are working to complete this setup and you will be notified when this feature is ready for use in your market.
